

Student name : **Shomokh ali**

ID :443808139

The FTP command used was **RETR**.

The file requested (downloaded) is **Whywecanthavenicecat.png**.

The FTP client sent the **RETR** command to request the server send the file **Whywecanthavenicecat.png**. RETR instructs the server to open a data connection and transfer the named file from its current working directory (/imagez) to the client.
